

# ALIZEE WOUTERS

Los Angeles, CA • (+1) 760-670-5407 • [ali.wout.3003@gmail.com](mailto:ali.wout.3003@gmail.com) • [alizee.me](https://alizee.me) • [linkedin.com/in/alizee-wouters](https://linkedin.com/in/alizee-wouters) • [github.com/aliwouters](https://github.com/aliwouters)

## EDUCATION

### Georgia Institute of Technology and Emory University | Atlanta, Georgia

- *M.S. in Biomedical Engineering, Specialization in Neuroengineering*

Expected June 2027

### University of California - Los Angeles, California

- *B.S. in Cognitive Science, Specialization in Computing; Minor in Data Science Engineering | GPA: 3.9* June 2026
- Honors: UCLA College Honors Program; PBK, ALD, & PES Honor Societies; Dean's Honors List; Rose Gilbert Memorial Scholar
- Certifications: Neuroscience & NeuroTech Credential, Queen's University, Canada

## RESEARCH EXPERIENCE

### CruX - UCLA Neurotechnology Organization

Sept 2023 - June 2026

*BCI Team Lead | NTX Competitor | External Affairs Coordinator | Co-Head of Consulting*

- Developed discrete EEG/GSR-based BCIs and multimodal neurotechnology systems for cognitive state decoding, emotion classification, and motor control with CNNs and LSTMs; presented findings at the California Neurotechnology Conference 2023, 2024, 2025, 2026.

### Dr. Tyler Clites' Anatomical Engineering Group, UCLA

Mar 2025 - June 2026

*Research Assistant & Independent Researcher*

- Used Vicon motion capture to analyze proprioception in referred muscle control following nerve injury and designed a multi-DOF EMG-driven soft robotic system to study agonist-antagonist muscle pairs  
**Poster:** "A Pilot Study on the Impact of Proprioception on Referred Control." *Neural Control of Movement*, 2025.
- Evaluated electromagnetic suspension of transfemoral prostheses using Vicon motion capture  
**Publication:** "Electromagnetic Suspension of Transfemoral Prostheses" (November 2026)

### Dr. Zili Liu's Perceptual Processing & Computation Lab, UCLA

Mar - Dec 2024

*Research Assistant | Project Lead | Lab Manager*

- Contributed to literature review, pilot study design, and manuscript preparation for a published study

## WORK EXPERIENCE

### SynterMed, UCLA Health - Los Angeles, CA

May 2026 - Present

*Neuronuclear Medicine and Imaging Consultant*

- Conduct quantitative FDG and tau PET research using NeuroQ and ADNI datasets to validate neuroimaging software and study Alzheimer's disease

### Braave - Los Angeles, CA

Nov 2025 - December 2025

*R&D Consultant*

- Developed biological sensor integration methods for Braave's wearable product line for clinical trials

### Psyonic - San Diego, CA

Jun - Jul 2024

*Mechatronics Intern*

- Designed and executed hardware testing protocols for the Ability Hand bionic prosthesis with an upper-limb amputee

### Autonomous Living Technologies - San Diego, CA

Aug - Sept 2024

*Assistive Technology Intern*

- Mentored quadriplegic students in vocational skill development using Cato assistive technology platforms

### UCLA Residential Life Learning Centers - Los Angeles, CA

Aug 2023 - June 2026

*MakerSpace Technician*

- Supported student prototyping; hands-on operation of 3D printers, laser engravers, and electronics assembly equipment

## SKILLS

**Software Engineering:** Python, C++, MATLAB, R

**Neuroengineering:** EEG, EMG, & GSR recording, processing, & classification; Neuroanatomy, prosthetics, imaging, & stimulation

**Data Science Engineering:** Machine Learning, Neural Networks, Bioinformatics, Computational Biology, Statistics and Probability

**Biomedical Engineering:** Bionic System Design, Medical Robotics, Medical Imaging Systems, Vicon Motion Capture, OpenSim

**Fabrication:** Fusion 360, 3D Printing, Laser Cutting, Electronics Assembly, Sewing, Woodworking, Digital Design, Adobe Suite

**Languages:** English & French (fluent) - US, French, and Belgian citizenship
