PROFESSIONAL SUMMARY

As a student and researcher in neurotechnology, cognitive science, and biomedical engineering, I am passionate about advancing brain-computer interfaces (BCI), assistive technologies, and neuroprosthetics. Dedicated to improving lives through human-centered design, I aim to create solutions that foster independence and capability. I plan to pursue graduate studies to become a Neuroengineer.

EDUCATION

University of California, Los Angeles

Jun 2026

- B.S., Cognitive Science, specialization in Computing. Cumulative GPA:3.9. Major GPA: 4.0
- Minor, Data Science Engineering with a focus on AI/ML and Bioinformatics (Samueli School of Engineering)
- Honors: UCLA College Honors Program, ALD and PES Honor Societies, Dean's Honors List
- Awards: 1st place, 2024 Annual California Neurotechnology Conference, BCI Emotion Detection Project
- Certification: Neuroscience and NeuroTech Micro-Credential Program at Queens University, Canada

RESEARCH EXPERIENCE

CruX, UCLA Neurotechnology Organization

Sep 2023 - Now

Positions held: BCI Team lead, NTX Competitor, External Affairs Coordinator, and Co-Head of Consulting

- Used EEG data to control a pincher based on different states of motor imagery
- Developed a discrete BCI headset. Used it to classify human emotions in real-time using CNN and LSTM
- Collaborating with Auli.Tech and G.Tech. Used BCI and GSR to classify stress in real-time poker games using ML

Dr Clites' Anatomical Engineering Group at UCLA, Nerve Injury Muscle Referential Control

Mar 2025 - Now

Positions held: Research Assistant, Independent Researcher

- Using Vicon to capture motion data, analyzing proprioception's impact on referred muscle control
- Developing EMG-controlled bio-inspired robotic systems with multiple degrees of freedom

Zili Lab at UCLA, Perceptual Processing and Computational Lab

Mar - Dec 2024

Positions held: Research Assistant, Project Lead, and Lab Manager

- Assessed visual benefits of action video games by quantitatively comparing novice and avid players' gameplay
- Improved UX/UI of a social media app through data collection, analysis, literature review, and market research
- Led and analyzed team performance. Recruited members and ensured smooth transitions in the team's structure

WORK EXPERIENCE

UCLA Residential Life Learning Centers, Los Angeles, CA

Aug 2023 - Now

MakerSpace Technician: Support student projects, maintain machines, manage inventory, and enforce SOP

Psyonic, San Diego, CA

Jun - Jul 2024

Mechatronics Intern: Developed testing courses for the Bionic Ability Hand in collaboration with an amputee

Autonomous Living Technologies, San Diego, CA

Aug - Sep 2024

Assistive Technology Intern: Mentored quadriplegic students in vocational skill development using Cato

SKILLS

- **Neurotechnology Certification:** Neuroanatomy, Neuroprosthetics, Neuroimaging, Neurostimulation
- **Comp Sci:** C++, MATLAB, Python, R, SwiftUI, Three.js, React
- **Software:** Vicon, OpenSim, Autodesk Fusion 360, SolidWorks, Adobe, Illustrator, Synthesia
- **Psych:** Cognitive Science, Behavioral Neuroscience, Cognitive Psychology, Experimental Design
- **Math:** Advanced Statistics and Probability, Calculus, Linear Algebra, Discrete Structures
- **Fabrication:** Graphic Design, 3D Printing, Laser Engraving, Electronics Assembly, Woodworking, Sewing
- **Language:** Fluent in French and English (USA, France, and Belgium nationalities)
